

Knight[®]

Protection you can stand behind

**SCREENING & HARDWARE
SOLUTIONS**

BY LINCOLN SENTRY

At KNIGHT[®], we believe protection should never be a compromise.

Not a compromise between strength and style; compliance and confidence; between doing the job properly and doing it profitably. Or between protecting a home and being proud of how it looks.

As a fabricator, every job carries your time, your margin and your name.

Right now, that probably means juggling multiple suppliers, mismatched components, and compliance you have to double-check yourself.

KNIGHT solves this for you with. One integrated screening system from frame to mesh to hardware, designed so you can manufacture and install faster, with the confidence you can stand behind every job that leaves your workshop.

Why stand behind KNIGHT?

Real protection does more than defend. It's about helping people have trust in the screening solution they choose, be proud of what they build and install, and be confident in what they stand behind.

Complete solution, one source

Everything together as a single integrated solution from frame to mesh to hardware. Fewer suppliers to manage, fewer compatibility issues and simpler purchasing.

Faster, easier screen fabrication and installation

The KNIGHT system has been designed with fabricator workflows in mind to simplify and speed up fabrication and installation.

Trusted, expert technical support

KNIGHT is brought to you by Lincoln Sentry with their national network, and proven technical expertise providing support well beyond the product itself.

INTRODUCING

KNIGHT[®] Screening Solutions

An innovative screening system and hardware solution designed with window and door screening fabricators in mind. Simplified ordering, easier and faster fabrication and installation, and a clearer choice of protection for homeowners.

Knight[®] SECURITY

KNIGHT Security Screening is engineered to withstand Australian conditions for durable, long-lasting security in residential applications.

- Designed with efficiency in mind for fast and easy fabrication and installation.
- Patented self-tensioning retention system
- No specialised tooling required
- Security-rated 316 Stainless Steel and Perforated Aluminium Mesh infill
- Contemporary aesthetics
- Simplified specification

Knight[®] LIFESTYLE

The KNIGHT Lifestyle (Barrier) Screening System is designed for projects where airflow, visibility and everyday separation are priorities.

Providing an attractive screening solution for a broad range of residential applications, the Lifestyle system expands the KNIGHT offering beyond security applications alone.

- Lifestyle screening applications
- Contemporary visual aesthetic
- No specialised tooling required
- Simplified specification

SUPPORTED BY DEDICATED

KNIGHT[®] Hardware Solutions

To complement the KNIGHT screening systems, Lincoln Sentry is introducing a new range of dedicated KNIGHT security and lifestyle screening hardware.

Door Locks | Multipoint Locks | Lock Cylinders | Security Hinges | Door Closers

Developed to create a more complete product offer, the range will continue to expand over time to support fabricators across security, lifestyle and specialty screening applications.

Knight®

Protection you can stand behind

KNIGHT is being built as a complete door and window screening solution for security, lifestyle and specialty screening applications.

Future product development will continue to expand the offer across systems, hardware and accessories.
