

Max Panel Weight: 30kg

Max Panel Height: 2400mm

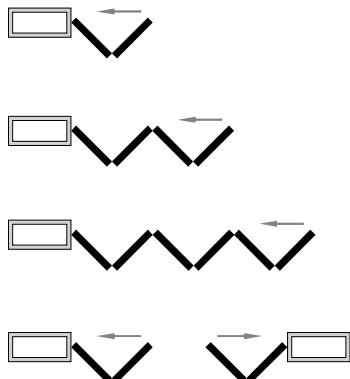

Height Adjustment: $\pm 3\text{mm}$

Max Panel Width: 650mm

Min Panel Thickness: 19mm

Horizontal Adjustment: $\pm 4.0\text{mm}$

Multifold 30

Application

Multifold 30 from Brio is a versatile, interior folding door hardware system. The axis on the pivot and hangers sits within 25mm of the edge of the door, minimising the overhang of the panels, improving appearance and making it possible to fit trim to hide the gap between track and panel. The hanger includes four precision bearings and a quick release plate. This with the single spanner height adjustment makes installation easy.
