

The PRODIGY cable basket offers a unique combination of features: speed of installation, strength and aesthetics unlike anything that has been seen before within a cable management system.

Prodigy is designed to hold cables, power packs and adapters ensuring the floor area under the workstation is clear of clutter, promoting a safer workspace.

Engineered with a combination of 3mm square wire to allow the flexibility required for Power, Data and AV installation, and 4mm square wire that gives the PRODIGY its unparalleled sturdiness when installed.

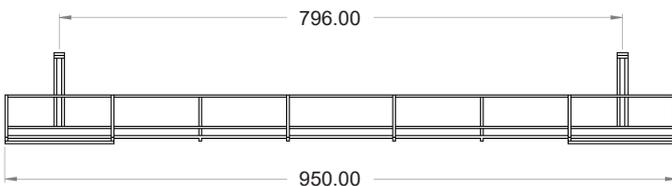

## INSTALLATION

PRODIGY comes with built in mounting arms. No screws supplied. Securing fixings may vary due to surface depth and surface material, as such fixings are to be supplied by the installer. A long drill bit or drill bit extension is required to fix bracket to the undersurface of the workstation.
