

FLYPRO 

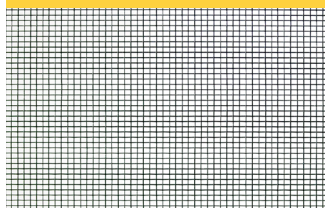

FLYSCREEN SYSTEM

PREMIUM **QUALITY**. **INNOVATIVE** SPECIFICATION. GREAT **VALUE**.

The FLYPRO® system is a comprehensive range of flyscreen fabrics, extrusion and hardware that offers an end-to-end fabrication solution.

FLYPRO® Metal Flyscreen Range

ALUMINIUM

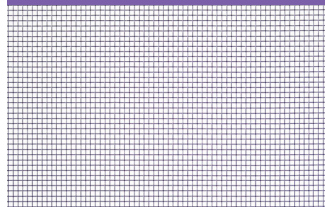

Optimised to achieve a balance between ease of installation and surface flatness.

ULTRA GUARD-AL

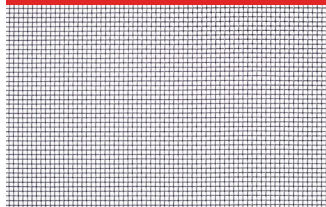

Ideal for screening doors. greatly increased rigidity and strength compared with standard aluminium mesh.

UNISCREEN-SS

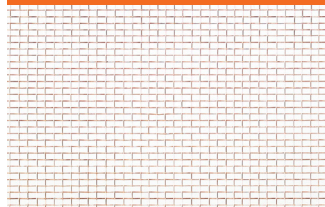

Developed as a universal flyscreen solution meeting all requirements: ease of installation, durability, invisibility, strength and corrosion resistance.

316 STAINLESS

Has a finer weave than traditional stainless mesh to create a clearer and more open view. This results in an unsurpassed flat and smooth screen surface.

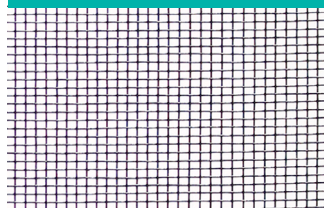

BRONZE

Made from a copper alloy material to create an attractive and luxurious high-end screen product for traditional or period style homes.

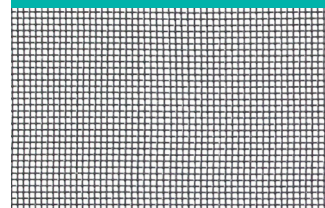

FLYPRO® Synthetic Flyscreen Range

FIBREGLASS

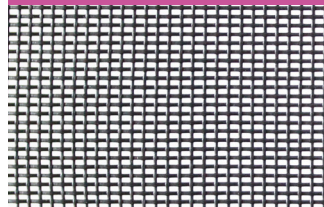

An economical option for producing residential window and door screens. It has good flexibility and will not dent, corrode or stain.

MIDGE-D-FENCE

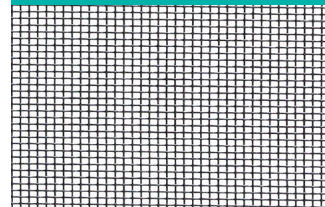

Provides a higher level of insect protection, with a 65 percent tighter weave than traditional fibreglass flyscreen.

PET-D-FENCE

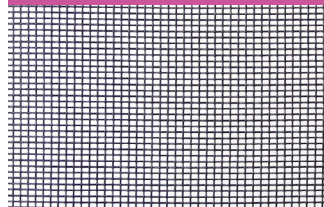

A highly durable synthetic screen that is ideal for screen doors where paws or small hands push against the screen.

POOL & PATIO-FG

Woven using a heavier fibreglass yarn than standard fibreglass to reduce sag. It is suitable to work in larger spans such as patio enclosures or retractable screens.

POOL & PATIO-PFY

Tougher than fibreglass insect screen, providing higher durability to your patio screens or retractable systems.

FLYPRO® System Range

WINDOW FRAME

- Available in 9mm and 11mm
- 17 colour options
- Pack qty 25, Crate qty 400

SILL WINDER SKIRT

- 62x15mm
- 17 colour options
- Pack qty 10

CORNER STAKES

- To suit 9mm & 11mm
- Pack qty 100 & 500

FLYPRO® Spline

FOAM SPLINE

Foam spline is an easy to install, softer and more compressible alternative to traditional PVC and rubber spline.

- Available in handy packs, trade rolls and bulk rolls ranging from 30-500m
- Size ranges 4.0mm to 6.3mm

PVC RIBBED SPLINE

PVC Ribbed Spline has an advantage of firmer grip allowing higher screen tension or resistance to pulling out when using heavy gauge material.

- Available in 300m lengths
- Size ranges 4.0mm to 6.0mm

"We're only interested in using quality products. Thanks to FLYPRO, previous costly and frustrating rework has been replaced with happy and satisfied clients, which is a win for us all."

- Scott Bailey, B & A Doors
