Proudly distributing Blum for 40 years

# We are Lincoln Sentry

The cabinetmaker's choice  
for specialty hardware

From our humble beginnings in Brisbane 40 years ago, Lincoln Sentry's reputation has continued to grow and evolve as one of Australia's leading distributors of world class speciality hardware and smart solutions to the commercial, new home and renovation sectors.

We love the trade. It's why we're so passionate about the industry and the partnerships we have with you - the expert craftsmen and design specialists who transform ordinary spaces into the extraordinary.

### Extensive product range

We aim to help our customers deliver quality work, backed by reliable and innovative hardware and solutions. Offering a diverse product portfolio sourced from across the globe and locally within Australia, we are committed to providing high quality specialty hardware solutions that help you create exciting spaces that shape the way people interact with where they work, live and play.

### Expert support

Whether you're a cabinetmaker, shopfitter, joiner or designer, our dedicated National Customer Support Centre (NCSC) and technical specialists are the experts you can count on. Problem solvers at heart, their expert knowledge and advice enables you to bring your smart and functional ideas to life.

With boots on the ground in 23 locations and counting, we're local and always close by to assist you with the best products, technical advice and support on offer.

And, our Online Store at [www.lincolnsentry.com.au](http://www.lincolnsentry.com.au) brings us even closer with fast access to Australia's largest range of cabinet hardware products from wherever you are, whenever it's convenient for you.

reddot winner 2022

More and more people are merging their kitchen, dining, living and working space. This trend places high demands on modern living concepts. Pocket systems make it possible to quickly, easily and intuitively open up entire spaces when needed, and close them off again when not in use. This gives you completely new design possibilities for a wide range of applications.

Blum's new product category is the solution for optimum space utilisation: REVEGO pocket systems is a unique slide - in door system with sophisticated technology integrated into its own narrow cabinet - the pocket.

## Contents

**12** Overview of product range

**14** Planning approach and product selection

**16** REVEGO uno, single door

**26** REVEGO uno + uno  
Two single doors combined

**36** REVEGO duo, double door

**48** REVEGO uno + duo, single door  
and double door combined

**66** REVEGO duo + duo, two double  
doors combined

**78** Calculations and assembly of the  
profiles

**83** EXPANDO T - for thin fronts

**84** Assembly devices

**85** Testing and inspection regulations

### Efficient manufacturing

REVEGO comes with all essential components thanks to the unique pocket construction with fully integrated fittings. You can easily pre - assemble pocket systems in your workshop or premises and transport them to end users in a carefully packaged state. This makes installation on site easier and increases efficiency.

Get a life - like experience of REVEGO.  
Download the AR application and get started:

[www.blum.com/rev3](http://www.blum.com/rev3)

### Rapid on - site installation

Final assembly on site is simplicity itself: set up, align and mount the pockets; install the doors and track; make adjustments to the gap layout - and that's it! The 3 - dimensional adjustment options are easily accessible and intuitive to use. And thanks to the integrated service interface, it is really simple to remove the fittings - even from built - in furniture.

### Easy planning

Standardised pocket widths of 100mm for REVEGO uno single door and 150mm for REVEGO duo double door give you the freedom to design the furniture around the pocket exactly as you wish. Single and double door applications can be individually combined.

### The ultimate in convenience

No need for handles thanks to TIP - ON motion technology; users can open cabinet doors with a single touch and slide them away completely into the pocket. To close off the space, the user simply presses the door to release it from the pocket and then presses it again to elegantly conceal the entire area.

## REVEGO at a glance

- Fast and easy installation thanks to pre - mounted fittings
- Unique pocket construction with fully integrated technology
- Easy planning thanks to predefined pocket widths
- Enhanced ease and mesmerising motion
- Individual design possibilities through the combination of REVEGO uno (1) and REVEGO duo (2)
- Different nominal lengths allow you to adapt applications to the installation situation
- Smooth opening and closing without a handle thanks to integrated TIP - ON motion technology
- Can be designed with or without plinth option or as a worktop - mounted cabinet
- Precise and easily accessible 3 - dimensional adjustment options
- Full overlay fronts completely conceal the pocket when closed for a perfect gap layout
- Pocket systems can be used in all living areas
- Suitable for systems to conceal runs of cabinets or walk - in solutions such as dressing rooms or pantries, etc.
- Fittings can be easily removed (even from built - in furniture) thanks to an integrated service interface

Use REVEGO uno single doors on their own, or combine them with REVEGO duo double doors as desired. The full overlay fronts with a height of up to 2980mm conceal the pocket completely when closed.

It is easy to implement solutions with internal cabinetry or walk - in solutions such as dressing rooms or pantries.

From a front height of 1130mm, REVEGO can also be implemented as a worktop - mounted cabinet.

## Easy product selection

Our Product Configurator makes it easy for you to choose your products and provides checked parts lists, planning information and CAD data.

[www.blum.com/rev1](http://www.blum.com/rev1)

Our services support you every step of the way - from planning and design through to manufacturing and assembly. Take advantage of our tried - and - tested and user - friendly services for your projects with REVEGO.

Our Product Configurator will help you select the right products quickly and efficiently. It gives you checked parts lists and planning information, as well as accurate production drawings.

You can export REVEGO projects in various CAD formats for use in your own design software. Together with selected partners, we have also established interfaces for the straightforward transfer of data and completion of your project in your design software.

Simply transfer your parts lists from the Product Configurator directly to the web shop of selected distributors. Your REVEGO configurations are easily saved to "My projects", where you can then manage your customer projects.

Speed up your production process with our Product Configurator. Transfer the planning results to MINIPRESS top with EASYSTICK (using BXF) or directly to your CNC machine. In order to transfer the data to your CNC machine, you'll receive specially prepared CAM data (CAM DXF or complete WOP drilling programs) in the Product Configurator. This makes production processes on the CNC machine even quicker and easier.

## Overview of applications and planning notes

### REVEGO uno - single door right or left

Page 14

- Number of fronts: 1
- Installation width: 450 to 900mm
- Internal width within the application: 350 to 800mm
- Front width: 442 - 898mm

### REVEGO uno + uno - two single doors combined

Page 24

- Number of fronts: 2
- Installation width: 900 to 1800mm
- Internal width within the application: 700 to 1600mm
- Front width: 442 - 898mm

### REVEGO duo - double door right or left

Page 34

- Number of fronts: 2
- Installation width: 900 to 1500mm
- Internal width within the application: 750 to 1350mm
- Front width: 442 - 748mm

## Overview of applications and planning notes

### REVEGO uno + duo - single door and double door combined

Page 46

- Number of fronts: 3
- Installation width: 1350 to 2400mm
- Internal width within the application: 1100 to 2150mm
- Front width: 442 - 748mm and 442 - 898mm

### REVEGO duo + duo - two double doors combined

Page 64

- Number of fronts: 4
- Installation width: 1800 to 3000mm
- Internal width within the application: 1500 to 2700mm
- Front width: 442 - 748mm

[www.blum.com/rev2](http://www.blum.com/rev2)

## Planning approach and product selection

EB	Installation width
LWA	Internal width within the application
FB	Front width

### Niche installation

Planning approach from outside moving inward with fixed installation width EB for the entire application. The space available determines the installation width EB and is the decisive factor for the number of fronts, front widths FB and thus for the choice of application. The fittings and cabinet dimensions within the application can be determined in the next step.

1.	2.	3.
What recess width is available for the application?	Determine the possible number of fronts and front widths FB based on the installation width EB.	The pocket dimensions, front protrusion FU and internal dimensions can now be defined on the planning pages of the respective application, and additional fittings can be selected.
The recess width is the installation width EB for the application.	This will determine the type of application.	

### Free - standing installation

Planning approach from the inside moving outward with focus on the cabinet width KB and cabinetry within the application. The cabinetry to be concealed is the decisive factor for the potential number of fronts, front widths FB and thus for the choice of application. The installation dimensions and fittings are determined in the next step.

1.	2.	3.
What is the cabinet width KB that needs to be concealed?	Determine the possible number of fronts and front widths FB based on the internal width within the application LWA.	The pocket dimensions and front protrusion FU can now be defined on the planning pages of the respective application, and additional fittings can be selected.
The cabinet width KB is the internal width within the application LWA.	This will determine the type of application and its installation width EB.	

### Front width FB and number of fronts

Planning approach with pre - defined front widths FB and number of fronts. The pre - defined front width FB and the number of fronts determine the choice of application and are the decisive factor for the installation width of the entire application. The fittings and cabinet dimensions within the application can be determined in the next step.

1.	2.	3.
What front width FB and what number of fronts were selected?	The type of application and desired front width FB plus the side gaps determine the installation width.	The pocket dimensions, front protrusion FU and internal dimensions can now be defined on the planning pages of the respective application, and additional fittings can be selected.
The number of fronts defines the type of application.		

# Planning approach and product selection

## Min. distance

### REVEGO uno

### REVEGO duo

A minimum distance to the nearest element in front of the pocket must be kept free for safety reasons!

FB + min. 300mm

FB Front width

POT Pocket depth

## Front protrusion FU

The minimum front protrusion results from the combination of nominal length, front width and the TIP - ON trigger path (AW) when using standard nominal lengths (pocket profile set with TIP - ON). By cutting the profiles to size, the front protrusion (FU) can be customised (min. FU = 7mm).

### Example

$$FU = FB + AW - NL$$

AW TIP - ON trigger path

FB Front width

FU Front protrusion

NL Nominal length

## Depth requirement

The depth requirement is the pocket depth (POT) and is determined by the nominal length + 100mm, plus the pocket back.

NL Nominal length

PORW Pocket back

POT Pocket depth

## Note

- The internal dimensions within the application (internal width | internal height | internal depth) define the maximum space available for internal cabinetry
- Design the widest front first for combined applications
- The manual operating force is less than 70 N according to the durability test
- Drilling patterns, cut - to - size dimensions and detailed parts lists can be found in the Product Configurator

## Assembly

- You will need a CNC machine or MINIPRESS top with EASYSTICK from Blum to machine the wooden parts
- Please note that both horizontal drillings and additional wood machining (e.g. a track cut - out) will be needed
- We recommend using the drilling template for REVEGO for the horizontal drillings
- See appendix for calculation and assembly information for cutting profiles to size

For more safety information, please go to:

[www.blum.com/rev4](http://www.blum.com/rev4)

## Planning

### Installation depth/pocket depth

$$ET = POT + FS (2mm) + FD$$

$$\text{Min. POT} = NL + POTV (\geq 100mm) + PORW (\geq 3mm)$$

### Installation width/internal width within the application

$$EB = LWA + POB (100mm)$$

$$FB = EB - Fsl - Fsr$$

$$Fsl/Fsr = 1.0 - 4.0mm$$

$$\text{Max. NL} = FB + 8mm$$

$$FU = FB - NL + 15mm$$

$$(\text{min. FU} = 7mm)$$

$$FD = 18 - 26mm$$

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- A partition side is required for a stand - alone application, or one adjacent to a worktop area.
- The internal width within the application determines the maximum width available for the internal cabinetry.
- For front thicknesses (FD) less than 18mm (possible depending on material/stability), we recommend a trial application.

EB Installation width

ET Installation depth

Fsl Gap left

Fsr Gap right

## Planning

Max. front weights for worktop - mounted cabinets in kg per front							
Front height FH (mm)	Front width FB (mm)						
	450	500	550	600	650	700	750
1130 - 1349	22	20	18	16	15	14	13
1350 - 1499	23	21	19	18	17	16	15
1500 - 1649	25	23	21	19	18	17	16
1650 - 1799	27	25	23	21	20	19	18
<b>Note</b>							
<ul style="list-style-type: none"><li>- The max. front width when planning a worktop - mounted cabinet is 750mm</li><li>- The max. pocket height when planning a worktop - mounted cabinet is 1806mm</li></ul>							

## Internal height and internal depth within the application

The diagram illustrates the internal dimensions of a cabinet door. It shows a vertical rectangle representing the door. A dashed vertical line is drawn near the left edge, with a horizontal dimension line labeled '35' indicating the offset from the left edge to this line. The horizontal distance from the dashed line to the right edge is labeled 'LTA'. The horizontal distance from the left edge to the right edge is labeled 'POT'. The vertical distance from the top edge to the bottom edge is labeled 'POH = LHA'.

$$LHA = POH$$

$$LTA = POT - 35mm$$

- The internal height/internal depth within the application determines the maximum height/depth available for the internal cabinetry.

LHA Internal height within the application

LTA Internal depth within the application

POH Pocket height

POT Pocket depth

### Overview

### Fittings selection made easy

It is easy to work out the fittings and drilling positions you need using the Product Configurator.

With every product configuration, you will receive manufacturing drawings, cutting lists for wooden parts and fittings, 3D CAD data for your design software, as well as CAM programs including drilling information for direct machining on your CNC machine, in addition to the checked parts list.

Enter the web code in the Product Configurator, click on the short URL or scan the QR code. Don't have login information for digital services yet? Register here and get access free of charge.

Please refer to the Lincoln Sentry website for installation instructions and drilling information.

# REVEGO uno + uno | Two single doors combined

## Planning

### Installation depth/pocket depth

$$ET = POT + FS (2mm) + FD$$

$$\text{Min. POT} = NL + POTV (\geq 100mm) + PORW (\geq 3mm)$$

### Installation width/internal width within the application

$$EB = 2 \times LWA1 + 2 \times POB (100 + 100mm)$$

$$FB = EB - Fsl - Fsr$$

$$Fsl/Fsr = 1.0 - 4.0mm; Fsm = 2.0 - 8.0mm$$

$$FD = 18 - 26mm$$

$$\text{Max. NL} = FB + 8mm$$

$$FU = FB - NL + 15mm$$

$$(\text{min. FU} = 7mm)$$

$$FD = 18 - 26mm$$

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- A partition side is required for a stand - alone application, or one adjacent to a worktop area.
- The internal width within the application determines the maximum width available for the internal cabinetry.
- For front thicknesses (FD) less than 18mm (possible depending on material/stability), we recommend a trial application.

## Planning

Minimum side gap

Pocket to pocket/adjacent cabinet

Pocket to wall/decor panel

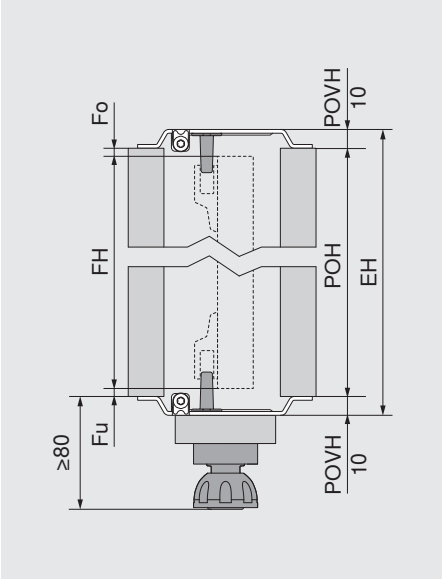

FD (mm)	Min. Fs (mm)
18 - 20	2
20.1 - 23	2.5
23.1 - 26	3

FD    Front thickness

Fs    Side gap

Installation height, front height

Application with plinth

$FH = POH - Fo - Fu$

$EH = POH + POVH \text{ top and bottom}$

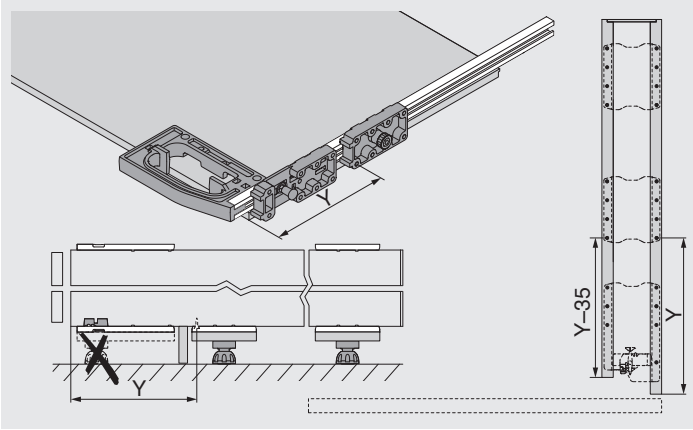

POVH 10mm: gap 0 - 6mm

- Take into account that the pocket must be tilted during installation.
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- The pocket connector height must be taken into account during planning
- Minimum plinth height 80mm

EH	Installation height
Fo	Top gap
Fu	Bottom gap
FH	Front height
POH	Pocket height
POVH	Pocket connector height

Application with set - back plinth

Additional rear pocket connector

# REVEGO uno + uno | Two single doors combined

## Planning

### Installation height, front height

#### Application without plinth

$$FH = POH - Fo - Fu$$

$$EH = POH + POVH \text{ top and bottom}$$

POVH top 10mm: gap 0 - 6mm

POVH bottom 3mm: gap from 7 - 13mm

- Take into account that the pocket must be tilted during installation.
- Minimum distance from the bottom front edge to the floor or next element below is 10mm
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- The pocket connector height must be taken into account during planning

EH Installation height

Fo Top gap

Fu Bottom gap

FH Front height

POH Pocket height

POVH Pocket connector height

### Installation height, front height

#### Worktop - mounted cabinet application

$$FH = POH - Fo - Fu$$

$$EH = POH + POVH \text{ top and bottom}$$

POVH top 10mm: gap 0 - 6mm

POVH bottom 3mm: gap from 3 - 6mm

- Take into account that the pocket must be tilted during installation.
- The minimum distance between the front and the next element below with a flush front (e.g. worktop is not visible) is 3mm
- The minimum distance between the front and the next element below with a protruding element (e.g. worktop is visible) is 6mm
- The minimum distance to the next movable element above is 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- A trial application is recommended in the edge areas
- The pocket connector height must be taken into account during planning
- The distance between the front and the next element above and below is made up of Fu or Fo + POVH

EH Installation height

Fo Top gap

Fu Bottom gap

FH Front height

POH Pocket height

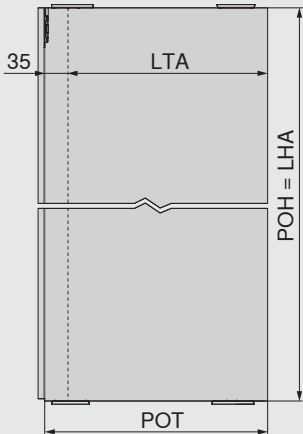

POVH Pocket connector height

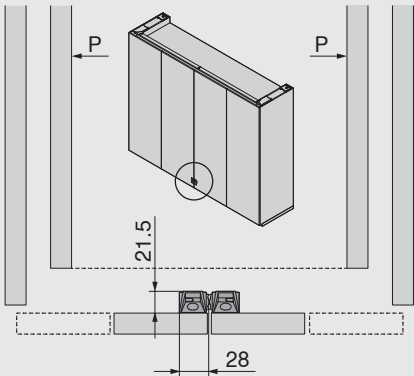

\* If the distance between the front and the next element below is < 6mm, the pocket connector must be embedded in the worktop

### Overview

### Fittings selection made easy

It is easy to work out the fittings and drilling positions you need using the Product Configurator.

With every product configuration, you will receive manufacturing drawings, cutting lists for wooden parts and fittings, 3D CAD data for your design software, as well as CAM programs including drilling information for direct machining on your CNC machine, in addition to the checked parts list.

Enter the web code in the Product Configurator, click on the short URL or scan the QR code. Don't have login information for digital services yet? Register here and get access free of charge.

## REVEGO duo | Double door

### Ordering information

7	Assembly set for one double door		Blum No		Code	
	Colour		Left	Right	Left	Right
	Black		802M0002.L2	802M0002.R2	7115185	7115186

#### Consisting of:

7a	1 x	Track fixing
7b	1 x	Cover for track fixing
7c	2 x	Pin for track fixing
7d	1 x	Door support on partition side (can be selected depending on installation situation)
7e	1 x	Door support for decor panel/cabinet side incl. attachment (can be selected depending on installation situation)

Z	Accessories
---	-------------

	Scuff Guard	Blum No	Code
	For front thicknesses starting from 23mm	802ZA00S	7115226
	For front thicknesses less than 23mm, the scuff guard can be used as additional front protection		

#### Consisting of:

3 x	External pocket side scuff guard
2 x	Internal pocket side scuff guard

	Screws	Pack Qty	Blum No	Code
	6 x 14.5mm system screws, nickel plated	1,000	661.1450.HG	7115105
	6 x 14.5mm system screws, onyx black	1,000	661.1450.HG	7116554

	Pocket Connector	Blum No	Code
	Rear pocket connector, pocket connector height (POVH) 10mm	801V5002	7116576

Additional pocket connector for set - back plinth leg

	EXPANDO T - for thin fronts	Blum No	Code
	EXPANDO T - single	70T4532T	7102466

EXPANDO T suitable for thin fronts - see page 83

For front thicknesses less than 18mm, we recommend a trial application

Screws are not included in the scope of delivery

Alignment/adjustment fitting for distorted doors		Code
	Alignment/adjustment fitting – Aluminium - For door / front thicknesses of 18-30mm. - Maximum door / front panel height 2600mm. - Length of the adjustment fitting 1990mm, can be shortened as required. - It is recommended that 2 vertical adjustment fittings are installed near the outer edge.	7113636
	Alignment/adjustment fitting – Plastic - For door / front panel thicknesses from 16mm. - Maximum door / front panel height 2600mm. - Length of the adjustment fitting 1990mm, can be shortened as required. - It is recommended that 2 vertical adjustment fittings are installed near the outer edge.	7113858

Please refer to the Lincoln Sentry website for installation instructions and drilling information.

# REVEGO duo | Double door

## Planning

### Installation width/internal width within the application

Without partition side:  $EB = LWA + POB (150mm)$

With partition side:  $EB = LWA + POB (150mm) + SS$

### Front width/front protrusion

$FB = (EB - Fsl - Fsm - Fsr) : 2$  (fronts)

$Fsl/Fsr = 1.0 - 4.0mm$ ;  $Fsm = 2.0 - 8.0mm$

Max.  $NL = FB + 8mm$

$FU = FB - NL + 15mm$

(min.  $FU = 7mm$ )

### Installation depth/pocket depth

$ET = POT + FS (2mm) + FD$

$FD = 18 - 26mm$

Min.  $POT = NL + POTV (\geq 100mm) + PORW (\geq 3mm)$

$POSD = 15 - 19mm$

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- The internal width within the application determines the maximum width available for the internal cabinetry.
- For front thicknesses (FD) less than 18mm (possible depending on material/stability), we recommend a trial application.

EB	Installation width
ET	Installation depth
Fsl	Gap left
Fsr	Gap right
Fsm	Centre side gap (between the fronts)
FB	Front width
FD	Front thickness
FS	Front gap
FU	Front protrusion
LWA	Internal width within the application
NL	Nominal length
POB	Pocket width
POT	Pocket depth
PORS	Pocket back cut
PORW	Pocket back
POSD	Pocket side thickness
POTV	Pocket depth loss
SS	Partition side (optional)

# REVEGO duo | Double door

## Planning

### Minimum side gap

#### Pocket to pocket/adjacent cabinet

#### Pocket to wall/decor panel

#### FD (mm)

#### Min. Fs (mm)

18 - 20	2
20.1 - 23	2.5
23.1 - 26	3

FD Front thickness

Fs Side gap

### Installation height, front height

#### Application with plinth

$$FH = POH - Fo - Fu$$

$$EH = POH + POVH \text{ top and bottom}$$

POVH 10mm: gap 0 - 6mm

- Take into account that the pocket must be tilted during installation.
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- The pocket connector height must be taken into account during planning
- Minimum plinth height 80mm

EH Installation height

Fo Top gap

Fu Bottom gap

FH Front height

POH Pocket height

POVH Pocket connector height

#### Application with set - back plinth

#### Additional rear pocket connector

# REVEGO duo | Double door

## Planning

Installation height, front height	
Application without plinth	
	$FH = POH - Fo - Fu$
	$EH = POH + POVH \text{ top and bottom}$
	POVH top 10mm: gap 0 - 6mm
	POVH bottom 3mm: gap from 7 - 13mm
	<ul style="list-style-type: none"> <li>- Take into account that the pocket must be tilted during installation.</li> <li>- Minimum distance from the bottom front edge to the floor or next element below is 10mm</li> <li>- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account</li> <li>- The pocket connector height must be taken into account during planning</li> </ul>
	EH Installation height
	Fo Top gap
	Fu Bottom gap
	FH Front height
	POH Pocket height
	POVH Pocket connector height

Installation height, front height	
Worktop - mounted cabinet application	
	$FH = POH - Fo - Fu$
	$EH = POH + POVH \text{ top and bottom}$
	POVH top 10mm: gap 0 - 6mm
	POVH bottom 3mm: gap from 3 - 6mm
	<ul style="list-style-type: none"> <li>- Take into account that the pocket must be tilted during installation.</li> <li>- The minimum distance between the front and the next element below with a flush front (e.g. worktop is not visible) is 3mm</li> <li>- The minimum distance between the front and the next element below with a protruding element (e.g. worktop is visible) is 6mm</li> <li>- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account</li> <li>- A trial application is recommended in the edge areas</li> <li>- The pocket connector height must be taken into account during planning</li> <li>- The distance between the front and the next element above and below is made up of Fu or Fo + POVH</li> </ul>
	EH Installation height
	Fo Top gap
	Fu Bottom gap
	FH Front height
	POH Pocket height
	POVH Pocket connector height

\* If the distance between the front and the next element below is < 6mm, the pocket connector must be embedded in the worktop

# REVEGO duo | Double door

## Planning

### Max. front weights for worktop - mounted cabinets in kg per front

Front height FH (mm)	Front width FB (mm)						
	450	500	550	600	650	700	750
1130 - 1349	22	20	18	16	15	14	13
1350 - 1499	23	21	19	18	17	16	15
1500 - 1649	25	23	21	19	18	17	16
1650 - 1799	27	25	23	21	20	19	18

### Note

- The max. pocket height when planning a worktop - mounted cabinet is 1806mm

### Door support on partition side

- Assembly height of the door support ideally as far down as possible, however up to a maximum height of 1000mm from the front bottom edge
- Ensure collision - free installation

FS	Front gap
SS	Partition side
7d	Door support on partition side

### Door support for decor panel/cabinet side

- Installation height AS: 64mm + Fu from the decor panel/cabinet bottom edge
- Installation height front: 64mm from the front bottom edge
- Ensure collision - free installation

AS	Decor panel/cabinet side
Fu	Bottom gap
7e	Door support for decor panel/cabinet side

# REVEGO duo | Double door

## Planning

Track installation dimension

Diagram illustrating the track installation dimensions for the REVEGO duo system. Key dimensions include: LBH = 83mm (Track cover panel height), LTF = 17mm (Track gap), LBD (Track cover panel thickness), LA = 100mm (Track cut - out), LV (Track installation), ZBD (Fixed shelf thickness), FD (Front thickness), FS (Pocket back cut), PORS = 35mm (Pocket back cut), and a maximum radius of R15 for the internal pocket side.

LBH = 83mm

LBD = 15 - 19mm  
(the spacer must be used  $\leq 17\text{mm}$ )

LTF = 17mm

LA = 100mm

LV = LA + ZBD ( $\geq 15\text{mm}$ )

- We recommend using a cross member to stabilise the fixed shelf. Minimum distance to front edge of internal pocket side = 170mm
- A solid connection between the fixed shelf and the pocket with connector fittings is recommended for an attractive gap layout
- No mounting of add - on parts directly on the track

FD    Front thickness

LA    Track cut - out

LV    Track installation

LBD    Track cover panel thickness

LBH    Track cover panel height

LTF    Track gap

PORS    Pocket back cut

ZBD    Fixed shelf thickness

Internal height and internal depth within the application

Diagram illustrating the internal height and internal depth within the application. Key dimensions include: LHA (Internal height within the application), LTA (Internal depth within the application), LV (Track installation), POH (Pocket height), and POT (Pocket depth). A fixed dimension of 70mm is also indicated for the internal depth.

LHA = POH - LV

LTA = POT - 70mm

- The internal height/internal depth within the application determines the maximum height/depth available for the internal cabinetry.

LHA    Internal height within the application

LTA    Internal depth within the application

LV    Track installation

POH    Pocket height

POT    Pocket depth

# REVEGO uno + duo | Single door and double door combined

REVEGO uno + duo - single door right or left and double door right or left

Space requirement			
Installation dimensions (mm)	Installation width EB	Installation height EH	Installation depth ET
	1350 - 2400	1155 - 3012	from 573

Front weight FG	up to 35 kg per front		

## Overview

### Fittings selection made easy

It is easy to work out the fittings and drilling positions you need using the Product Configurator.

With every product configuration, you will receive manufacturing drawings, cutting lists for wooden parts and fittings, 3D CAD data for your design software, as well as CAM programs including drilling information for direct machining on your CNC machine, in addition to the checked parts list.

Enter the web code in the Product Configurator, click on the short URL or scan the QR code. Don't have login information for digital services yet? Register here and get access free of charge.

Please refer to the Lincoln Sentry website for installation instructions and drilling information.

# REVEGO uno + duo | Single door and double door combined

## Planning

### Installation width/internal width within the application

EB = LWA1 + LWA2 + POB1 (100mm) + POB2 (150mm)

### Front width/front protrusion

Double door: FB = (LWA2 + POB2 - Fsl - Fsm - Fsr) : 2 (fronts)

Single door: FB = LWA1 + POB1 - Fsl - Fsr

Fsl/Fsr = 1.0 - 4.0mm; Fsm = 2.0 - 8.0mm

Max. NL = FB + 8mm

FU = FB - NL + 15mm

(min. FU = 7mm)

### Installation depth/pocket depth

ET = POT + FS (2mm) + FD

FD = 18 - 26mm

Min. POT = NL + POTV ( $\geq 100$ mm) + PORW ( $\geq 3$ mm)

POSD = 15 - 19mm

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- The internal width within the application determines the maximum width available for the internal cabinetry.
- For front thicknesses (FD) less than 18mm (possible depending on material/stability), we recommend a trial application.

EB Installation width

ET Installation depth

### Installation height, front height

#### Worktop - mounted cabinet application

$$FH = POH - Fo - Fu$$

$$EH = POH + POVH \text{ top and bottom}$$

POVH top 10mm: gap 0 - 6mm

POVH bottom 3mm: gap from 3 - 6mm

- Take into account that the pocket must be tilted during installation.
- The minimum distance between the front and the next element below with a flush front (e.g. worktop is not visible) is 3mm
- The minimum distance between the front and the next element below with a protruding element (e.g. worktop is visible) is 6mm
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- A trial application is recommended in the edge areas
- The pocket connector height must be taken into account during planning
- The distance between the front and the next element above and below is made up of Fu or Fo + POVH

EH Installation height

Fo Top gap

Fu Bottom gap

FH Front height

POH Pocket height

POVH Pocket connector height

\* If the distance between the front and the next element below is < 6mm, the pocket connector must be embedded in the worktop

# REVEGO uno + duo | Single door and double door combined

## Planning

Max. front weights for worktop - mounted cabinets in kg per front

Front height FH (mm)	Front width FB (mm)						
	450	500	550	600	650	700	750
1130 - 1349	22	20	18	16	15	14	13
1350 - 1499	23	21	19	18	17	16	15
1500 - 1649	25	23	21	19	18	17	16
1650 - 1799	27	25	23	21	20	19	18

### Note

#### REVEGO uno:

- The max. front width when planning a worktop - mounted cabinet is 750mm
- The max. pocket height when planning a worktop - mounted cabinet is 1806mm

#### REVEGO duo:

- The max. pocket height when planning a worktop - mounted cabinet is 1806mm

### Inter - door support

- Supports a single door against a double door, two single doors against each other or two double doors against each other

P Pocket

### Inner door support incl. tip - assist

- Support on the worktop area, plinth front, cabinet, etc.
- Distance from internal cabinetry: 70 - 218/350mm
- Assembly height of the door support ideally as far down as possible, however up to a maximum height of 1000mm from the front bottom edge

P Pocket

# REVEGO uno + duo | Single door and double door combined

## Planning

Track installation dimension

Diagram illustrating the track installation dimension. Key dimensions shown include: LBH = 83mm (Track cover panel height), LTF = 17mm (Track gap), LBD (Track cover panel thickness), LA = 100mm (Track cut - out), LV (Track installation), ZBD (Fixed shelf thickness), FD (Front thickness), FS (Pocket back cut), PORS = 35mm (Pocket back cut), and a 105mm dimension for the internal depth. A note indicates 'max R15' for the internal corner radius.

LBH = 83mm

LBD = 15 - 19mm  
(the spacer must be used  $\leq 17\text{mm}$ )

LTF = 17mm

LA = 100mm

LV = LA + ZBD ( $\geq 15\text{mm}$ )

- We recommend using a cross member to stabilise the fixed shelf. Minimum distance to front edge of internal pocket side = 170mm
- A solid connection between the fixed shelf and the pocket with connector fittings is recommended for an attractive gap layout
- No mounting of add - on parts directly on the track

FD	Front thickness
LA	Track cut - out
LV	Track installation
LBD	Track cover panel thickness
LBH	Track cover panel height
LTF	Track gap
PORS	Pocket back cut
ZBD	Fixed shelf thickness

Internal height and internal depth within the application

Diagram illustrating the internal height and internal depth within the application. Key dimensions shown include: LHA (Internal height within the application), LTA (Internal depth within the application), LV (Track installation), POH (Pocket height), POT (Pocket depth), and a 70mm dimension for the internal depth offset.

LHA = POH - LV

LTA = POT - 70mm

- The internal height/internal depth within the application determines the maximum height/depth available for the internal cabinetry.

LHA	Internal height within the application
LTA	Internal depth within the application
LV	Track installation
POH	Pocket height
POT	Pocket depth

## REVEGO duo + duo | Two double doors combined

#### Overview

#### Fittings selection made easy

It is easy to work out the fittings and drilling positions you need using the Product Configurator.

With every product configuration, you will receive manufacturing drawings, cutting lists for wooden parts and fittings, 3D CAD data for your design software, as well as CAM programs including drilling information for direct machining on your CNC machine, in addition to the checked parts list.

Enter the web code in the Product Configurator, click on the short URL or scan the QR code. Don't have login information for digital services yet? Register here and get access free of charge.

### Ordering information

Z	Accessories
---	-------------

	Inner door support incl. tip - assist	Blum No	Code
	Length of support: 218mm	802ZA030	7115227
	Length of support: 350mm	802ZA031	7116555

For additional support on the worktop area, plinth front, cabinet, etc.

	Scuff Guard	Blum No	Code
	For front thicknesses starting from 23mm	802ZA00S	7115226
	For front thicknesses less than 23mm, the scuff guard can be used as additional front protection		

#### Consisting of:

3 x	External pocket side scuff guard
2 x	Internal pocket side scuff guard

	Screws	Pack Qty	Blum No	Code
	6 x 14.5mm system screws, nickel plated	1,000	661.1450.HG	7115105
	6 x 14.5mm system screws, onyx black	1,000	661.1450.HG	7116554

	Pocket Connector	Blum No	Code
	Rear pocket connector, pocket connector height (POVH) 10mm	801V5002	7116576

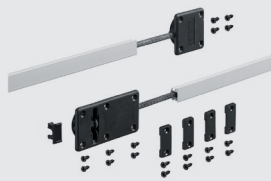

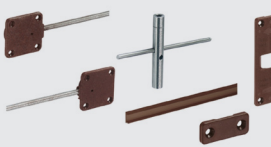

Additional pocket connector for set - back plinth leg

	EXPANDO T - for thin fronts	Blum No	Code
	EXPANDO T - single	70T4532T	7102466

EXPANDO T suitable for thin fronts - see page 83

For front thicknesses less than 18mm, we recommend a trial application

Screws are not included in the scope of delivery

Alignment/adjustment fitting for distorted doors		Code
	Alignment/adjustment fitting – Aluminium	7113636
	<ul style="list-style-type: none"> <li>- For door / front thicknesses of 18-30mm.</li> <li>- Maximum door / front panel height 2600mm.</li> <li>- Length of the adjustment fitting 1990mm, can be shortened as required.</li> <li>- It is recommended that 2 vertical adjustment fittings are installed near the outer edge.</li> </ul>	
	Alignment/adjustment fitting – Plastic	7113858
	<ul style="list-style-type: none"> <li>- For door / front panel thicknesses from 16mm.</li> <li>- Maximum door / front panel height 2600mm.</li> <li>- Length of the adjustment fitting 1990mm, can be shortened as required.</li> <li>- It is recommended that 2 vertical adjustment fittings are installed near the outer edge.</li> </ul>	

Please refer to the Lincoln Sentry website for installation instructions and drilling information.

# REVEGO duo + duo | Two double doors combined

## Planning

### Installation width/internal width within the application

$$EB = 2 \times LWA2 + 2 \times POB \text{ (150 + 150mm)}$$

### Front width/front protrusion

$$FB = (EB - Fsl - 3 \times Fsm - Fsr) : 4 \text{ (fronts)}$$

$$Fsl/Fsr = 1.0 - 4.0\text{mm}; Fsm = 2.0 - 8.0\text{mm}$$

$$\text{Max. NL} = FB + 8\text{mm}$$

$$FU = FB - NL + 15\text{mm}$$

$$\text{(min. FU = 7mm)}$$

### Installation depth/pocket depth

$$ET = POT + FS \text{ (2mm)} + FD$$

$$FD = 18 - 26\text{mm}$$

$$\text{Min. POT} = NL + POTV (\geq 100\text{mm}) + PORW (\geq 3\text{mm})$$

$$POSD = 15 - 19\text{mm}$$

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- The internal width within the application determines the maximum width available for the internal cabinetry.
- For front thicknesses (FD) less than 18mm (possible depending on material/stability), we recommend a trial application.

Planning

Installation height, front height

Application with plinth

$FH = POH - Fo - Fu$

$EH = POH + POVH \text{ top and bottom}$

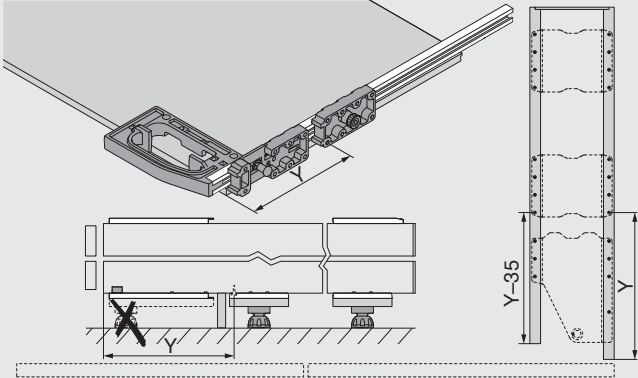

POVH 10mm: gap 0 - 6mm

- Take into account that the pocket must be tilted during installation.
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- The pocket connector height must be taken into account during planning
- Minimum plinth height 80mm

EH	Installation height
Fo	Top gap
Fu	Bottom gap
FH	Front height
POH	Pocket height
POVH	Pocket connector height

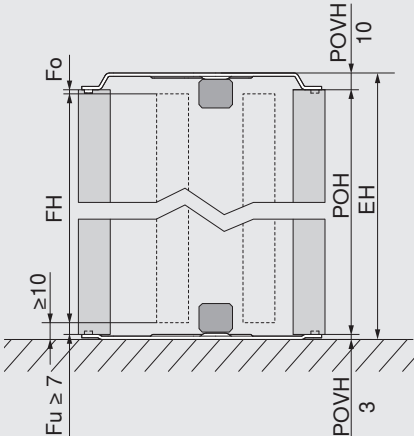

Application with set - back plinth

Additional rear pocket connector

Installation height, front height

Application without plinth

$FH = POH - Fo - Fu$

$EH = POH + POVH \text{ top and bottom}$

POVH top 10mm: gap 0 - 6mm

POVH bottom 3mm: gap from 7 - 13mm

- Take into account that the pocket must be tilted during installation.
- Minimum distance from the bottom front edge to the floor or next element below is 10mm
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- The pocket connector height must be taken into account during planning

EH	Installation height
Fo	Top gap
Fu	Bottom gap
FH	Front height
POH	Pocket height
POVH	Pocket connector height

# REVEGO duo + duo | Two double doors combined

## Planning

### Installation height, front height

#### Worktop - mounted cabinet application

\* If the distance between the front and the next element below is < 6mm, the pocket connector must be embedded in the worktop

$$FH = POH - Fo - Fu$$

$$EH = POH + POVH \text{ top and bottom}$$

POVH top 10mm: gap 0 - 6mm

POVH bottom 3mm: gap from 3 - 6mm

- Take into account that the pocket must be tilted during installation.
- The minimum distance between the front and the next element below with a flush front (e.g. worktop is not visible) is 3mm
- The minimum distance between the front and the next element below with a protruding element (e.g. worktop is visible) is 6mm
- Minimum distance to the next movable element above 3mm, for non - movable elements a front insertion space of 6mm must be taken into account
- A trial application is recommended in the edge areas
- The pocket connector height must be taken into account during planning
- The distance between the front and the next element above and below is made up of  $Fu$  or  $Fo + POVH$

EH Installation height

Fo Top gap

Fu Bottom gap

FH Front height

POH Pocket height

POVH Pocket connector height

### Max. front weights for worktop - mounted cabinets in kg per front

Front height FH (mm)	Front width FB (mm)						
	450	500	550	600	650	700	750
1130 - 1349	22	20	18	16	15	14	13
1350 - 1499	23	21	19	18	17	16	15
1500 - 1649	25	23	21	19	18	17	16
1650 - 1799	27	25	23	21	20	19	18

#### Note

- The max. pocket height when planning a worktop - mounted cabinet is 1806mm

# REVEGO duo + duo | Two double doors combined

## Planning

Inner door support

- Support on the worktop area, plinth front, cabinet, etc.  
- Distance from internal cabinetry: 70 - 218/350mm  
- Assembly height of the door support ideally as far down as possible, however up to a maximum height of 1000mm from the front bottom edge

P Pocket

Inter - door support

- Supports a single door against a double door, two single doors against each other or two double doors against each other

P Pocket

Track installation dimension

LBH = 83mm

LBD = 15 - 19mm  
(the spacer must be used ≤ 17mm )

LTF = 17mm

LA = 100mm

LV = LA + ZBD (≥ 15mm)

LBH = 83

LBD

LTF = 17

LA = 100

LV

ZBD

FD

FS

PORS = 35

max R15

105

- We recommend using a cross member to stabilise the fixed shelf.  
Minimum distance to front edge of internal pocket side = 170mm

- A solid connection between the fixed shelf and the pocket with connector fittings is recommended for an attractive gap layout

- No mounting of add - on parts directly on the track

FD	Front thickness
LA	Track cut - out
LV	Track installation
LBD	Track cover panel thickness
LBH	Track cover panel height
LTF	Track gap
PORS	Pocket back cut
ZBD	Fixed shelf thickness

Internal height and internal depth within the application

LTA

LHA

POH

LV

POT

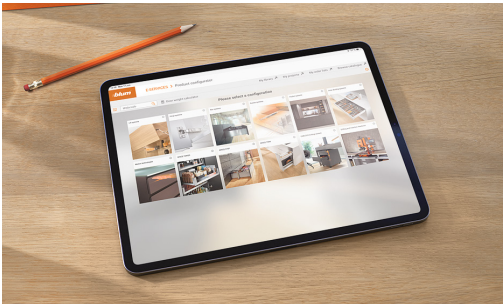

70

LHA = POH - LV

LTA = POT - 70mm

- The internal height/internal depth within the application determines the maximum height/depth available for the internal cabinetry

LHA	Internal height within the application
LTA	Internal depth within the application
LV	Track installation
POH	Pocket height
POT	Pocket depth

### Product Configurator

Obtain the exact calculation for assembling the cut - to - size profiles quickly and efficiently using the Product Configurator. The configurator calculates all the dimensions for each configuration and also outputs them as drawings.

# EXPANDO T

- EXPANDO T - fixing system
- Thin fronts measuring 8mm or more
- Different front materials

EXPANDO T - single			Blum No	Code
	<b>Colour</b>	<b>Material</b>		
	Dark grey	Nylon/steel	70T4532T	7102466

## Drilling depth | Screw selection - EXPANDO T

Screws with M4 thread have to be used for EXPANDO T single

Select the lowest possible drilling depth to suit the screw length when using the single dowel

BT Drilling depth

ES Screw penetration depth

ES min. = 4mm

ES max. = BT - 0.5mm

\* Stone and ceramic +0.2/- 0.1mm

## Assembly - EXPANDO T

## Area of application and assembly recommendation

EXPANDO T is suitable for fixing Blum fittings to thin cabinet fronts of all types of materials. Front materials can be just 8mm thick or more, provided they are sufficiently stable and strong.

A trial application is recommended.

Nm Minimum tightening torque

Materials tested by Blum	Nm
Chipboard (transverse tensile strength > 0.4 N/mm <sup>2</sup> )	1.5
MDF (transverse tensile strength > 0.6 N/mm <sup>2</sup> )	1.5
HDF	2
HPL	2
Mineral composites	2
<b>Front weight</b>	
Max. 35 kg per front	

## Limitation of liability

Blum accepts no liability for the use of EXPANDO T in combination with materials not listed or fittings from other manufacturers. It is recommended that assembly be carried out by an experienced furniture manufacturer.

Find more information on assembly and adjustment of EXPANDO T at [www.blum.com/rev13](http://www.blum.com/rev13)

## Assembly devices

### Gauge set for REVEGO pocket connector

- Drilling template for horizontal drillings of REVEGO pocket connectors on the pocket side wall
- Material: nylon/steel/aluminium

Ordering information	Blum No	Code
	STL 8000.01	7115229

# Internal testing and inspection regulations

Durability		
		40,000 opening and closing cycles.
Abuse test		
		Horizontal load test to ensure that system will withstand misuse
Slam open/slam shut test		
		To simulate overload when opening and closing and ensure that the fronts do not detach from fittings.
Corrosion testing		
		Based on DIN EN ISO 9227 and DIN EN ISO 6270 - 2 for simulating corrosion influences.
