

1120/1130 SERIES DOOR CONTROLS

The Briton 1120/1130 Series is a non-handed, slimline closer designed to be used on commercial interior/exterior wooden and metal doors e.g. storeroom, office and bathroom doors.

Door closing is hydraulically controlled, with adjustable valve regulators, back check, closing and latching speed, and spring strength power control to give the desired closing speed.

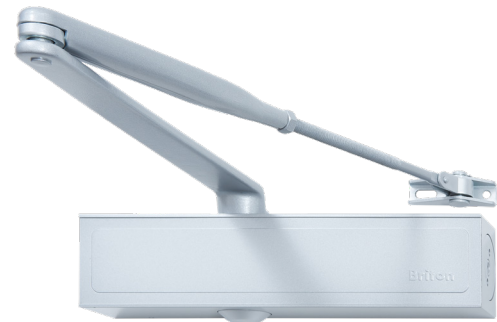

The 1120/1130 Series has a precision rack and pinion mechanism and is easily mounted to the surface of door or the top jamb.

Each standard door closer offers three installation methods including mounting on pull or push sides, top jamb and parallel arm installations.

FEATURES

- Universal, fully reversible, non-handed door closer
- Closer body constructed from pressure die cast aluminium with steel rack and pinion
- Tested to 500,000 cycles
- Factory set to strength 3
- Independent adjustment valves for controlling backcheck, closing and latching speeds
- Fire Resistance tested in accordance with AS1905.1

All door closer options available in Silver, Matt Black and Stainless Steel variants.

Standard / Parallel Arm Door Closer

Track Arm Door Closer
