

THE PROFESSIONAL'S CHOICE

It's not just a CAULKING GUN It's a SVENIC

BG 12 BARREL GUN

Quick release end caps minimise loading and unloading time. Increases productivity.

Anodised aluminium barrel resists corrosion.

Minimal wasted trigger movement from thick, smooth double catch plates and wear compensating device. Increases work life and productivity.

Hardened steel push rod for longer life.

Swivel carriage allows for continuous beading without stopping, even around corners.

Hanging Hook enhances safety and convenience as the tool can be hung from the ladder, gutter, belt, etc.

Extra strong metal construction ensures reliability and long use.

Profiled hand grip and balanced design, provides comfortable use for all hand sizes. Significantly reduces user fatigue.

12:1 trigger thrust exerts up to 2.5 kN force. Makes dispensing low to high viscosity materials feel much easier.

Premium tough epoxy powder coating.

- Outperforms and outlasts cheap inferior products that can result in operator injury or customer dissatisfaction.
- Dispenses 600 ml sachets and 300 ml cartridges of PU, silicone, gap sealant, timber adhesive and other low to high viscosity materials.
- Professional quality and exceptional value.
- Durable and reliable; designed to last.
- Separate plunger kit available that converts the tool to bulk material loading from pails.

FEATURES & BENEFITS

This is the tool for the TRADESMAN and PROFESSIONAL. The BG 12 BARREL GUN is designed for dispensing HIGH VISCOSITY (HV) materials and high output. Professionals dispensing one 600 ml sachet (sausage) after another should use this tool. Note: Excessive forces, on any tools trigger mechanism, will reduce the working life and efficiency of the tool. If a material feels difficult or hard to dispense, then a tool with a 26:1 trigger ratio or thrust should be used. A higher ratio tool will make dispensing feel much easier and not negate the warranty.

Wear Compensating Device

Extends Tools Working Life by Eliminating Loss of Trigger Movement

Hanging Hook

Enhances Safety | User Convenience | Allows the Tool to be Hung from Ladder | Gutter | Belt | Storage

Durable, Reliable & Very Powerful

Metal Construction Ensures Reliability | High Power Delivering Exceptional Performance | Thick Materials Feel Much Easier to Dispense

Dispenses 600 ml Satchets & 300 ml Cartridges

Gap Sealants | Timber Adhesives | Silicones | Caulks | Polyurethanes & Polyesters

Premium Quality

Tough Epoxy Powder Coating Resists Corrosion | Anodised Aluminium Barrel & Tough Epoxy Powder Coated Trigger & Butt Resist Corrosion

Hardened Push Rod

Increases Working Life

12:1 Trigger Thrust

Exerts up to 2.5 kN of Force | Makes Dispensing Thick or Viscous Materials Feel Easier

Balanced Design with Profiled Hand Grip

Reduces User Fatigue | Comfortable, Easier Operation for All Hand Sizes

Double Catch Plates

Provides Greater Impact Resistance | Better Grip to Rod

Operating Efficiency

Enhanced by the Effortless Trigger Action | Allows for Smooth Full Strokes

Swivel Barrel

Allows for Continuous Beading Without Changing Angle of the Trigger, Even When Gunning Around Corners

Quick Release End Caps

Reduces Filling Time & Increases Operator Efficiency

Parts & Kits

Additional Nozzles, Sachet & Bulk Plungers Available

Low Maintenance

Keep Rod & Trigger Mechanism Clean from Dirt & Sealant | Add a Few Drops of Oil Regularly to the Tool's Mechanism for Continued Performance

**Units per Carton: 10 | Carton Weight: 10.6 kg
Carton Dimensions: 50 X 28 X 28 cm**

614TLV PRO GUN 2 LV

Carton Quantity: 25 | Carton Weight: 8.6 kg | Carton Dimensions: 38 x 20 x 35 cm

The Painter's Choice for dispensing 300 ml cartridges of gap sealant, silicone and other low viscosity materials. Not suitable for medium to high viscosity materials.

7:1 Trigger Thrust

Exerts up to 1.0 kN of Force

Automatic 'No Drip' Trigger

No Mess | No Fuss | No Waste | No Drip

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Resilient Tough Frame

Made from Nylon 6 & 20% Glass Reinforcing

Moulded Cartridge Support Strap

Holds Cartridge in Place

616TLV PRO GUN MV

Carton Quantity: 24 | Carton Weight: 12.6 kg | Carton Dimensions: 38 x 20 x 35 cm

The Trademan's Choice for dispensing 300 ml cartridges of gap sealant, silicone and other low to medium viscosity materials. Not suitable for high viscosity (thick) materials.

7:1 Trigger Thrust

Exerts up to 1.2 kN of Force

Automatic 'No Drip' Trigger

No Mess | No Fuss | No Waste | No Drip

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Strong Lightweight Metal Construction

Ensures Reliability

Durable Construction

Providing Excellent Performance

620TLV HV 12 GUN

Carton Quantity: 12 | Carton Weight: 9.8 kg | Carton Dimensions: 38 x 25 x 25 cm

The Professional's Choice for dispensing 300 ml cartridges of gap sealant, timber adhesive, silicone, caulk and PU. Suitable for low to high viscosity materials.

12:1 Trigger Thrust

Exerts up to 2.5 kN of Force
Thick Materials Easier to Dispense

Wear Compensating Device

Extends Working Life | Eliminates
Loss of Trigger Movement

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Durable, Reliable & Very Powerful

Delivers Exceptional Performance

Double Catch Plate

Provides Greater Impact Resistance
Better Grip to Rod

Balanced Design | Profiled Hand Grip

Provides Comfortable Use | All Hand Sizes

623TLV HV 26 GUN

Carton Quantity: 12 | Carton Weight: 12.1 kg | Carton Dimensions: 38 x 27 x 31 cm

The Professional's Choice for dispensing 300 ml cartridges of gap sealant, timber adhesive, silicones, caulk and PU. Suitable for low to very high viscosity materials.

26:1 Trigger Thrust

Exerts up to 4.5 kN of Force | Thick
Materials Much Easier to Dispense

Wear Compensating Device

Extends Working Life | Eliminates
Loss of Trigger Movement

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Durable, Reliable w/ Superior Power

Delivers Exceptional Performance

Double Catch Plate

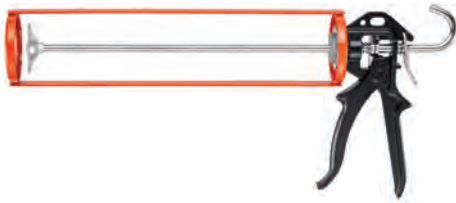

Provides Greater Impact Resistance
Better Grip to Rod

Balanced Design | Profiled Hand Grip

Provides Comfortable Use | All Hand Sizes

625TLV JUMBO GUN

Carton Quantity: 12 | Carton Weight: 13.4 kg | Carton Dimensions: 48 x 29 x 29 cm

The Professional's Choice for dispensing 850 ml cartridges of timber and panel adhesive, silicone, caulk and mastic. Suitable for low to medium viscosity materials.

12.1 Trigger Thrust

Exerts up to 2.5 kN of Force
Most Materials Easier to Dispense

Wear Compensating Device

Extends Working Life | Eliminates
Loss of Trigger Movement

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Durable, Reliable w/ Superior Power

Delivers Exceptional Performance

Double Catch Plate

Provides Greater Impact Resistance
Better Grip to Rod

Balanced Design | Profiled Hand Grip

Provides Comfortable Use | All Hand Sizes

676TLV BG 12 BARREL GUN

Carton Quantity: 10 | Carton Weight: 10.6 kg | Carton Dimensions: 50 x 28 x 28 cm

The Professional's Choice for dispensing 600 ml sachets (sausages) and 300 ml cartridges of gap sealant, timber adhesive, silicone, caulk and PU. Suitable for low to high viscosity materials.

12.1 Trigger Thrust

Exerts up to 2.5 kN of Force
Thick Materials Easier to Dispense

Wear Compensating Device

Extends Working Life | Eliminates
Loss of Trigger Movement

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Rotating Barrel

Allows Continuous Beading
whilst Dispensing

Durable, Reliable & Very Powerful

Delivers Exceptional Performance

Double Catch Plate

Provides Greater Impact Resistance
Better Grip to Rod

Balanced Design | Profiled Hand Grip

Provides Comfortable Use | All Hand Sizes

685TLV POINTING PRO GUN

Carton Quantity: 6 | Carton Weight: 15.1 kg | Carton Dimensions: 50 x 48 x 31 cm

The Professional's Tool for repointing, grouting, filling gaps and joints between brick work, pavers, tiles and stonework. Ideal for dispensing sand cement mixtures, mortars, grouts and pre-formulated materials.

12.1 Trigger Thrust

Exerts up to 2.5 kN of Force
Thick Materials Easier to Dispense

800 ml Barrel Capacity

Low Maintenance | Very Easy to Use
Quick Cleaning

Wear Compensating Device

Extends Working Life | Eliminates
Loss of Trigger Movement

Individually Packaged

In POS Box

Hanging Hook

Great for Ladder | Gutter | Belt | Storage

Hardened Push Rod

Increases Working Life

Durable, Reliable w/ Superior Power

Delivers Exceptional Performance

Double Catch Plate

Provides Greater Impact Resistance
Better Grip to Rod

Balanced Design | Profiled Hand Grip

Provides Comfortable Use | All Hand Sizes

CAULKING GUNS

Svenic has been a leading supplier of quality sealant and adhesive application equipment since 1984.

We have available, a range of friction driven skeleton Caulking Guns designed to dispense small (300 ml) and large (850 ml) rigid cartridges, containing a variety of products, including high viscosity materials.

Unlike Caulking Guns which are ratchet driven, the push rod on our totally friction driven mechanism cannot strip and provides for infinite incremental rod movements and better dispensing control.

Our range ensures that customers have an extensive variety of products available which are suitable for the handyman or price conscious user, through to tradesmen and professionals, who must demand nothing less than high quality tools.

In addition to our skeleton gun range, Svenic also provides Barrel Guns for sachets (sausages), Air and Battery Guns for sachets and cartridges, a range of 2 Part Guns as well as other specialist Caulking Guns.

OPERATING INSTRUCTIONS | SKELETON GUN RANGE:

Hold applicator as shown above. Whilst depressing thumb release plate withdraw push rod.

Never hold the applicator as shown above. The push rod cannot be withdrawn whilst the trigger is depressed – even slightly. Any pressure on the trigger will lock the push rod in place.

Insert cartridges as indicated. Ensure front of cartridge is placed securely within the guns end ring.

Move push rod hard against cartridge plunger. Cut cartridge and nozzle as required and depress trigger to commence gunning.
